

Intensive Rescue Balm

Dr Anders Intensive Rescue Balm is formulated with the key ingredients:

- **Urea** – attracts water from the deeper layers of the skin, hydrating the cells and reducing the gaps. It also softens the cells in the surface layers and loosens them, enabling them to be shed more easily.
- **Lactic acid** – an AHA which gently breaks down the 'glue like' bonds between cells in the upper layer of the skin and triggers repair. This helps the hardened skin cells to fall off and helps the skin keep more water in, softening and improve the appearance of hard, callused skin.
- **Olus oil** – has excellent emollient and occlusive effects, moisturising the skin whilst acting as a barrier to moisture loss. It is hypoallergenic, and suitable for those with sensitive, dry and itchy skin conditions.
- **Colloidal oatmeal** – relieves dry skin, eczema, psoriasis, acne, sunburn and brings soothing comfort to irritated skin.
- **Vitamin E** is known for its healing and protective effects.
- **Lanolin** – penetrates deeply and creates a barrier in the underlying layers of skin to prevent moisture from escaping.
- **Dermasoft Decalact** – a powerful antimicrobial proven to eliminate the Trichophyton species of fungus. It is 100% natural and ECOCERT registered.
- **Thuja occidentalis** – commonly known as Arbor vitae or "Tree of Life" has been used for centuries as a medicinal and has been proven to have powerful antiviral and antifungal properties.

Features

Benefits

Breaks down hard callused skin

Penetrates deep into the epidermis locking moisture in and rehydrating even tough, hard and cracked skin
Reduces the pain associated with having hard, callused skin
Eliminates cracks and fissures

Forms a protective barrier

Aids the penetration of the moisturising ingredients into epidermis, reduces water loss by evaporation and helps skin to retain water for longer

Relieves and soothes

Packed with the most efficacious soothing ingredients to help reduce discomfort from the pain of cracked heels

Antimicrobial

Antimicrobial action of Dermasoft[®] decalact and Thuja occidentalis improves the condition of the skin and protects against infection

Absorbs exceptionally quickly

Quick and easy to apply
